PROJECTS

Live occupancy Tracking system (ongoing)

Problem statement:

- * Developed a system to provide real-time building occupancy data for enhanced emergency response.
- * Addressed the critical need for accurate occupancy tracking in high-density areas to improve public safety.
- * Enabled efficient resource allocation during emergencies and overcrowding situations through live occupancy monitoring.

Objectives:

This system aims to enhance safety by providing critical data for emergency responders and preventing overcrowding in busy areas, ultimately improving public safety and emergency management.

Conclusion:

- * Developed a reliable, real-time people-counting system using IR sensors, enabling accurate occupancy monitoring and space utilization insights.
- * Successfully implemented an efficient solution with visual LED display, demonstrating potential for diverse applications and further enhancements.

I, Hemasri N, hereby declare that all the information provided in this resume is true to the best of my knowledge and belief

STRENGTHS

Strengths:

Problem solving-Adapting and finding effective solutions to unexpected situations and challenges.
Team: working efficiently within diverse groups to achieve shared goals.
